Hello there, I'm a full-stack web developer based in El Salvador with experience in JavaScript, CSS, Next.js, vanilla JavaScript, React, and Tailwind. I build dynamic, responsive applications using APIs and Firestore, applying UX/UI design principles to create intuitive user interfaces.

On the backend, I work with PHP, Node.js with MongoDB, and SQL, enabling me to deliver full-stack solutions and collaborate effectively with teams. I've contributed to projects in web development, branding, and market research, which helped me develop strong communication and leadership skills. I'm eager to keep learning and contribute to the success of every project I join.

Guillermo Eguizabal
Web Developer

Cloud Services:

aws — Basis knowledge
Amazon web Services

Tools & Platforms:

Zustand · Figma · Wordpress · FireStore · Postman · Insomnia · Netlify · Vercel

Soft Skills

- **Leadership:** I've learned to take initiative and guide teams with empathy. I keep communication clear and ensure everyone stays aligned and motivated to achieve shared goals.
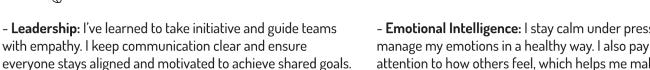

- **Assertive Communication:** I express my ideas clearly and respectfully. Whether I'm talking to a client, a teammate, or a manager, I make sure my message is direct and constructive, and I always listen actively.

- **Empathy:** I believe understanding others is key to any successful project. I take time to listen to my clients and teammates, which helps me create more thoughtful and effective solutions.

- **Emotional Intelligence:** I stay calm under pressure and manage my emotions in a healthy way. I also pay close attention to how others feel, which helps me make better decisions and collaborate smoothly.

- **Creativity:** I enjoy finding new ways to solve problems. Whether in design, development, or strategy, I look for fresh approaches that add value and deliver something unique.

EXPERIENCE

Kodigo
Full-Stack Jr
Remote – El Salvador
Oct 2024 – May 2025

Built a SPA with React and React Hook Form for efficient data handling. Developed a medical appointment interface with Firestore integration. Created reusable components with HTML, CSS, and JS via Frontend Mentor, and built a booking platform using API endpoints for a smooth user experience.

Amazonas EcoTravel
Web Developer
Remote — Syracuse, United States
Jul 2024 – Jan 2025

Built and maintained a website using WordPress, Elementor, and additional tools, ensuring an optimized, user-friendly design. Managed site users and content efficiently, maintaining data security and structured access across the site.

Moda Week International(MWINTL)
Content Creator & Web Developer
Remote — New York, United States
Jan 2022 – Dec 2024

Curated cohesive color palettes, refined photo compositions, and developed branded corporate materials for high-profile fashion events, enhancing overall visual identity. Designed promotional assets and edited videos for social media and YouTube using Adobe Premiere and After Effects. Developed a complete website and visual assets using WIX and Adobe tools. Launched and optimized paid ad campaigns using Meta Business Suite, resulting in a measurable increase in reach and brand visibility

Expedition George of the Jungle
Content Creator & Web Developer
Hybrid — Leticia, Amazonas, Colombia
Jan 2022 – Jan 2025

Redesigned brand identity, created merchandise, maps, and media from tourism activities in the Amazon using Adobe tools. Edited photos and videos, aligning visual content with the agency's brand. Developed a full website using WIX and Adobe software, ran ad campaigns on Meta Business Suite, conducted market research in Spanish and English, monitored Google Analytics, supported ad strategies, and assisted as a translator for tourist activities.
